Art Unit: 2811

1. Applicant's election with traverse of claims 1-2 in the reply filed on 5/26/06 is acknowledged. The traversal is on the ground(s) that since claims 3 and 4 are now dependent from claim 1, either directly or indirectly, the unity of invention standard includes such claims and all of the claims should be considered together consistent with the previous treatment of the original claims. This is found persuasive and the restriction is withdrawn.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 (line 4) contains the trademark/trade name SUS304-BA plate. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a base film and, accordingly, the identification/description is indefinite.

Claim 1, line 6, the phrase "back surface of a base film" is unclear whether it is being referred to "a back surface of a base film".

Claim 1, line 6, the phrase "a surface and back surface of a base film" is unclear whether the surface of the base film is different from the back surface of the base film.

Claim 3, lines 6-9, the phrase "fixing a non-circuit-formed surface of the semiconductor wafer on a semiconductor wafer grinding machine via the substrate and mechanically grinding the non-circuit-formed surface of the semiconductor wafer" is unclear as to how the semiconductor wafer grinding machine mechanically grinding the non-circuit-formed surface of the semiconductor wafer when the non-circuit-formed surface of the semiconductor wafer formed on the semiconductor wafer grinding machine via the substrate.

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
